Binh Tan, HCM City

Hello I'm Truong Quoc Bao

I am a web developer with a strong command of JavaScript and React, specializing in creating high-performance, optimized applications that deliver exceptional user experiences.

Front-end Developer

INFROMATION

- **Linkedin:** <https://www.linkedin.com/in/quoc-bao-truong-769b77343/>
- **Github:** <https://github.com/quoc-bao-dev>
- **Website:** quocbaoart.com

TECHNICAL SKILL

Language And Tool

- **Languages:** Javascript, Typescript, HTML, CSS
- **Tools:** Figma, Git, Docker, Jest, Cypress
- **Experience in automated testing with Jest & Cypress.**
- **Skilled in app packaging and deployment with Docker & CI/CD.**

Front-end

- **Frameworks:** React, Next.js, Angular, Vue.js, Nuxt.js
- **Libraries:** React, Redux, TanStack Query, Zustand, React Signify, React Hook Form, RxJS, Pinia, Recharts, i18next
- **CSS Tools & Utilities:** Tailwind CSS, Sass
- **UI Libraries:** Mantine UI, ShadCN, Material UI
- **Experienced in building modern, high-performance, and secure frontend apps with React and Next.js.** Proficient in SSR, SSG, and ISR. Strong in state management, responsive UI, and performance optimization.

Back-end

- **Frameworks:** Express, Fastify, NestJS
- **Strong understanding of RESTful services, with the ability to handle APIs effectively**
- **Experienced with JWT, OAuth2, and WebSocket for secure and real-time applications.**

Database

- **Database:** PostgreSQL, MongoDB, Redis
- **Skilled in database design, management, and optimization using MongoDB, with expertise in implementing caching solutions using Redis to enhance performance and scalability.**

SOFT SKILL

- **Time Management:** Ability to estimate time and allocate tasks efficiently.
- **Teamwork:** Experienced in Scrum methodology and supporting team members.
- **Problem-Solving:** Skilled in analyzing issues and implementing effective solutions.
- **Communication:** Clear in conveying ideas, active listening, and technical documentation.

CERTIFICATE

React developer certificate - Instate21
(2024 - 2027)
<https://interstate21.com/certificate/?code=5E30N3X>

ACHIEVEMENT

- Achieved the titles of Excellent Student and Outstanding Student throughout multiple semesters
- GPA: 9.1

ARTICLE

Qyber – A Library for Building SPAs with TypeScript

Published on the official website of University. This article introduces Qyber, a TypeScript-based library designed to facilitate the development of Single Page Applications (SPA).

WORK EXPERIENCE

Intern at FPT Software

Dec 2023 - Feb 2024

Mock Project: A task management system for team collaboration, tracking progress, and analyzing project & personnel performance. Gained expertise in coding standards, Scrum-Agile project workflows, and company policies.

- **Tech Stack:** React, Zustand, React Query, GSAP, Mantine, DndKit, React Hook Form.
- **Key Responsibilities:**
 - Designed and implemented an intuitive user interface.
 - Integrated and optimized API interactions for seamless functionality.
 - Developed drag-and-drop features using DndKit to improve user experience.
 - Created data visualization tools to track team and project performance effectively.
- **Team Size:** 2 members.

Developer at FPT Software

Mar 2024 – Dec 2024

Impacto - Zenro: Developed a consulting platform that empowers SME businesses to assess and optimize their Sustainable Development Goals (SDG) policies.

- **Tech Stack:** Next.js, Mantine, Zustand, Tailwind CSS, React Hook Form, i18n, Axios, React Query.
- **Key Responsibilities:**
 - Implemented and integrated robust APIs to ensure seamless platform functionality.
 - Developed data visualization features to effectively present assessment insights.
 - Engineered and managed complex form interactions, including single-choice, multiple-choice, matrix input, text input, file upload, and nested question structures.
- **Team Size:** 4 members.

Freelance Developer

Dec 2024 – Feb 2025

Nglearn: A knowledge-sharing platform and tool hub designed to support developers.

Link: <https://nglearns.dev>

- **Tech Stack:** React, Tailwind CSS, React Hook Form, React Signify, Framer Motion.
- **Key Responsibilities:**
 - Implemented a secure login page using OAuth for authentication.
 - Designed and built the UI for the home page, ensuring an intuitive user experience.
 - Optimized application performance to enhance load times and overall responsiveness.
- **Team Size:** 3 members.

Frontend Developer at Rovi Travel

Feb 2025 – Present

Rovi Travel – A production company specializing in travel technology solutions

System: Internal Management System

- **Tech Stack:** Vue.js, Vue Router, Vuex.
- **Key Responsibilities:**
 - Maintained and improved the company's internal platform using Vue.js.
 - Implemented UI components and handled frontend business logic (form flows, validations, data interactions).
 - Collaborated with backend engineers to ensure seamless API integration.
- **Team Size:** 4 members.

Product: AI-powered Travel Consultation Platform

Description: A standalone platform that uses AI to provide personalized travel advice.

- **Link:** <https://rovitravel.com>
- **Tech Stack:** Next.js, Tailwind CSS, TanStack Query, Zustand, Lang Chain.
- **Key Responsibilities:**
 - Independently designed the architecture and selected technologies for the project.
 - Developed the frontend using Next.js with a focus on performance and scalability.
 - Implemented real-time chat with OpenAI streaming API, allowing seamless user interaction.
- **Team Size:** 4 members.
